- RJ45 10/100/1000 Ethernet
- LCD Touch Pad Control

TEAC's new **DiscSprinter** Disc Publishing System offers an unmatched client server experience through feature-rich software, powerful embedded computers and integrated dye-sublimation printing. You need not look any further than the DiscSprinter for your organization's disc publishing needs.

TEAC **P-55C**, integrated in the DiscSprinter, is the world's fastest dye-sublimation thermal disc printer. It produces the sharpest photo quality prints and is the world's only dye-sublimation disc printer. It is also the only four-color CMYK (Cyan, Magenta, Yellow and Black) disc printer that offers "True-Black" instead of composite black by including the Black panel on the ribbon. Exclusive VersaMax ribbon for the P-55C printer provides the widest media compatibility; therefore, lowest cost-per-printed discs for customers.

**Enterprise Wide Disc Publishing**

**Network Sharing...**

Provide your network users access to a professional CD/DVD publishing system while maintaining centralized control.

**Automated Data Archiving**

**Easy Integration Into Existing Archive Policy...**

Simple yet powerful, PoINT software uses HOT FOLDER to fully automate CD and DVD recording and printing of archive sets.

**Digital Video Production Asset Management**

**DVD and Blu-ray™ In-house Production...**

Maintain your creative control and cut weeks off your production schedule with state-of-the-art automated disc publishing.

**Software Publishing**

**Take Control of Your Production...**

Whether you are producing 10 discs or 1000, take control on your time with your own in-house disc publisher.
