

2U and 4U CD/DVD Rackmount Duplicators

- Stand-alone rackmount duplication system
- Copy and verify
- One-touch duplication
- Automatically detects DVD or CD masters
- LCD display for status and errors

TEAC's new DVW/DR11A/KIT and DVW/DR14A/KIT are rackmount duplicators based on the same high-speed, reliable TEAC optical drives as the TEAC line of tower duplicators.

TEAC's DVW/DR11A/KIT is the perfect choice for houses of worship, recording studios or anywhere else rackmounting is important.

TEAC's DVW/DR14A/KIT includes a high-speed hard disk drive for saving disc images that can be written over and over and to extract audio tracks. It has one master transport and four destination drives. Two can be chained together for 1x8 duplication. When the hard drive is used as a master source, the DVW/DR14A/KIT uses all five drives for writing new discs.

Product Specifications

Models:	2U: DVW/DR11A/KIT 4U: DVW/DR14A/KIT
Power Source:	115V / 230V 50-60Hz switchable power supply
